

# DR. SETI'S STARSHIP

Searching For The Ultimate DX

## When Did We Become Obsolete?

**T**hink back, if you are old enough (and if you are a member of The SETI League, demographics suggest you most likely are), to the exciting days of October 1957. The world's first artificial satellite, Sputnik 1, had just been placed in orbit. It was launched by the USSR (that area of the world had been known by this acronym for two generations, although in America they still were collectively referred to as "The Russians"). If you, like me, were living in the U.S. at the time, you were being told that the USSR was an enemy nation, the Russians an enemy people. Your enemy was in space; you could hear them on 20 Mc (this was in the days before MHz)! America was suddenly a paranoid nation.

Think back, if you are old enough (and if you're a radio amateur, statistics suggest you most likely are), to the frantic days immediately following Sputnik. The United States was trying desperately to play catch-up. Your high school guidance counselor was telling you, "You're good at science. You're good at math. Go and become an engineer; we will never have enough engineers to catch up to the Russians." (At the same time, you learned years later, your friend Sasha Zaitsev in the USSR was being told by his high school guidance counselor, "You're good at science. You're good at math. Go and become an engineer; we will never have enough engineers to stay ahead of the Americans.")

Think back, if you are not yet senile (and if you're able to read this, there is still hope), to when you first got your ham radio license. The world that Sputnik had made smaller was suddenly shrinking even more. You could talk (okay, so it was probably via Morse Code) to other hams halfway around the world—maybe even to the dreaded Russians. Maybe they weren't your enemy after all.

Think back, if you are old enough (and if you've read this far, I know you are), to the excitement of December 1961.

\*Executive Director, The SETI League, Inc.,

*Look around. Do you see many young faces in the crowd at a typical SETI League meeting? Well, neither do I. We all are becoming graybeards, and if that doesn't concern us, perhaps it should. (WA2UNP photo)*

With a little help from your USAF friends, a handful of ham radio operators had just launched OSCAR 1, the world's first non-government satellite. You could hear it on 145 Mc (this was still in the days before MHz)! Suddenly schools (the same ones that were training Americans to catch up with the Russians, and the same ones that were training Russians to stay ahead of the Americans) were activating ham radio clubs, building antennas, and pointing them . . . up!

Now think back to last week. Surely you're old enough to have noticed your kid (or maybe your grandkid) Instant Messaging to his buddies in Russia. Maybe he/she doesn't remember what USSR stood for, but he/she knows all the countries in the world by their e-mail suffixes. Never mind that those same international suffixes used to be ham callsign prefixes. What matters is that your offspring are talking to the world via IM and e-mail and VoIP (Voice over Internet Protocol) and cell phones—and yes, even via satellite links, links invisible to them. Do you think they have any need for ham radio? Probably no more than we have need for spark. The world has passed us by.

Or has it? Are there a few things we can still teach our kids, our grandkids, before they put us out to pasture? I like to think there are.

Think forward to a world linked by a telecommunications infrastructure that rivals science fiction's boldest predictions. Every man, woman, and child carries a communicator (possibly implanted) that links him or her to everyone else on Earth—instantly, and cheaply, via satellite, in whatever language the participants choose. You thought Paramount Studios held all the patents on the Universal Translator/Communicator? So did I. However, it wasn't long before this technology permeated our society . . . and transformed it.

Now think far forward and about a civilization in decline. For generations, our descendants took for granted a technological base that unified their world. Nobody needed ham radio; it was obsolete, overtaken by progress. Nobody needed The SETI League; it was a vestige of a bygone era, a footnote in the history books. All anybody needed was to think the right words, and the neural interface self-activated, putting any individual in instant contact with any other, at

the speed of thought. The omnipresent satellites were invisible not only to their eyes, but to their mind's eye as well.

Until they began to fail. Our machines, like ourselves, are mortal. Suddenly, there was nobody on Earth who remembered Keplerian elements. There was nobody alive who remembered Maxwell's Equations. Right ascension and declination might as well have been mystical incantations to a long-dead god. The global net fell silent, and not a soul had a clue about how to fix it.

Fortunately, a group of anthropologists and historians remembered something from their school days, a primitive creature, cryogenically preserved, who had roamed the Earth in those prehistoric days when satellites were new, and Russians and Americans thought themselves enemies. A being who used ancient, stone-age tools such as dishes and LNAs and frequency synthesizers and digital signal processing to squeeze out crude, low-information-content signals from the stars.

Thus, they thawed out this creature and put him to work, and he saved the world.

He was an amateur radio astronomer.  
He was a SETI League member.  
He was you.

73, Paul, N6TX

## CQ BOOKS

### McCoy on Antennas

by **Low McCoy, W1ICP**  
Unlike many technical publications, Low presents his invaluable antenna information in a casual, non-intimidating way for anyone!

Order No. MCCOY **\$15.95**

### HR Anthologies

**\$19.95 ea.**

**Buy all 4 for only \$75**

Enjoy collections of the best material published in *Ham Radio* magazine, conveniently arranged by subject and original publication date.

**Homebrewing Techniques**.....Order # AHOME  
**Test Eqpt & Repair Techniques**.....Order # ATEST  
**Antennas - 1968 - 1972**.....Order # ANTS1  
**Antennas - 1973 - 1975**.....Order # ANTS2  
*Get all 4 for \$75 plus Free shipping...Order # ASET*

Shipping & Handling: U.S. & Possessions add \$5 for the first item, \$2.50 for the second & \$1 for each additional item. Free shipping on orders over \$75. Foreign S&H calculated by order weight and destination and added to your credit card charge.
